

SYSTEM AND METHOD FOR PROVIDING WIRELESS DEVICE ACCESS**Abstract**

A system and method for enabling users to send and receive messages and other information from mobile devices and enabling users to access server-based information using mobile devices over wireless data networks are disclosed. The present invention provides a system and method for providing wireless device access where users may have access to electronic mail, calendar, public directories and other information from the user's mobile device, such as a cell phone, interactive pager, PDA or other wireless device, via a wireless service provider.
